Due to the large County Drain (Dell Creek, Branch #1) on the west side of the road for a large portion of the project, the cost to provide a non-motorized facility is prohibitive. Further, there is no connectivity to other current or planned non-motorized facilities at the southern end. During design, the BCRC will explore non-motorized (wide shoulders) from US-10 to the Tri-City Sports Complex (Sports “Dome”) driveway just south of US-10.
