

## Proposed February 2022 revision to Complete Streets process

### *Key Points*

- Elimination of Complete Streets Forms
- Replacement with monthly pre-Technical Zoom® call with MATS staff, NMT representative and affected agencies only
- This meeting would review proposed TIP changes (new projects & scope changes to existing projects), potential NMT aspects, and review with NMT representative
- A table would then be created for subsequent presentation at Technical and Policy
- Would attempt to resolve issues prior to technical committee approval, followed by Policy committee
- Currently, categorical exemptions are made for transit operating assistance under the 5311 and 5307 programs
